Digitization and Data Specialist
ARCE Archives Digitization and Publishing Project (ADPP), Grant Position
Cairo, Egypt

Announcement Number: ARCE/20-07
Issue Date: September 24, 2020
Closing Date: October 22, 2020
The American Research Center in Egypt (ARCE) is a private nonprofit organization whose mission is “to support research on all aspects of Egyptian history and culture, foster a broader knowledge about Egypt among the general public, and strengthen American-Egyptian cultural ties.”

ARCE was founded in 1948 by a consortium of American academic and cultural institutions and scholars to promote greater knowledge of Egypt and the Middle East and to facilitate the work of American scholars conducting research in Egypt. Today ARCE continues the work for which it was founded and further plays an active role collaborating with Egypt’s Ministry of Antiquities. It sponsors training courses and activities in Egypt and conducts conservation projects that span the temporal and cultural range of the country’s vast heritage (from prehistory to modern times, from archaeological sites and monuments to museum objects to texts). ARCE also undertakes significant outreach activities within the United States focused on raising awareness of and interest in Egypt among the general public.

A Leader in Egyptian Academic Research

ARCE is a membership organization composed of both institutional members (Research Supporting Members or RSMs) and individual members. The RSMs comprise virtually all of the major North American academic and cultural institutions with research interests in Egypt and include some of the most prestigious private and public academic and cultural institutions.

ARCE has developed from a small academic and scholarly organization into a complex and culturally significant institution with permanent facilities in both Cairo and the U.S. The Cairo office includes a specialist library on Egypt utilized by scholars and students as well as ARCE members. Programs developed with resources from the United States Agency for International Development have resulted in over 75 completed projects of monument conservation. Specialized training of well over 750 Egyptian archaeologists and conservators will contribute toward the future preservation of Egypt’s cultural heritage.
ARCE’s Activities and Programs

ARCE’s activities and programs take place in both the United States and Egypt. U.S. activities focus on an annual scholarly meeting, informational and promotional tours, chapter events, and related activities. Egypt is the primary focus of ARCE’s core work, which centers around three crucial, inter-related axes: Preserving World Heritage; Educating the Next Generation of Scholars; and Excavating and Conserving Ancient Sites and Monuments.

Preserving World Heritage

ARCE’s broad work in Egypt includes conservation of culturally significant sites, monuments, architecture, artworks, religious inscriptions, texts, and artifacts representing thousands of years of Egypt’s cultural achievement. Through its Antiquities Endowment Fund, for example, ARCE has supported the preservation of early mud brick monumental architecture at Abydos, the palace at Malqata (western Thebes) built by Amenhotep III of Dynasty 18, the unique Coptic frescoes and monuments of the Red Monastery, and the Hisn al-Bab. Likewise, it has supported the conservation and documentation of Egyptian coffins and a Theban tomb field school for the tomb’s epigraphic, photographic, and artifact recording.

Educating the Next Generation of Scholars

ARCE’s fellowships allow U.S. scholars to do important research in Egypt. Over the course of five decades, fellowships have benefited over 650 scholars whose research interests spanned the entirety of Egypt’s history and culture. ARCE’s Field School training projects create a new generation of Egyptian archaeologists and conservators, as well. In June 2013, ARCE ran its first field school organized and run completely by Egyptians and taught in Arabic. Those leading the training were themselves former graduates of ARCE field schools.

Excavating and Conserving Ancient Sites and Monuments

ARCE facilitates the fieldwork activities of its Research Supporting Members and interfaces with the Ministry of Antiquities on their behalf. ARCE’s RSMs undertake a wide variety of archaeological activities, including survey, excavation, conservation, and site management. Current RSMs operate archaeological projects all over Egypt, focused mainly but not exclusively on prehistoric, pharaonic, and Graeco-Roman sites. ARCE-affiliated projects include archaeological work at the Giza Pyramids, South Abydos, Luxor, Tell Gabbara in the Delta, Tell Edfu in Upper Egypt, and the Red Monastery Project in Sohag.
The Candidate

A Digitization and Data Specialist will be hired to process and complete digitization and data preparation of the required collections for the ADPP project and the successful ingestion within the UCLA Digital Library system.

Background

❖ At least two years of experience in production and management of digitization and publication projects.
❖ Fluency in English with excellent writing skills (a sample is required).
❖ Bachelor degree in Archival Studies, Cultural Heritage Management, Information Science, or Digital Humanities.
❖ Proficiency in Microsoft office, and Adobe creative Cloud

The Responsibilities

Skills and Accomplishments

❖ Coordinate the complete digitization of any non-digital material using in-house equipment or external vendors as necessary. Digitize documents, photographs and drawings.
❖ Use Adobe Creative Cloud for image and documents processing.
❖ Assess the quality of the finalized digitized data.
❖ Prepare all files for ingestion and publication using established file name conventions, metadata standards, file formatting, etc. through file editing and/or metadata entry.
❖ Conduct large-scale data preparation and data entry.
❖ Update and edit ARCE project processing manual to reflect all necessary changes.
❖ Maintain naming conventions and structure protocols.
❖ Assist the project manager and metadata specialist to prepare annual and final reports on project accomplishments.
❖ Document metadata, website, and overall project processes, progress, and setbacks, as well as lessons learned and areas for improvement.
❖ Work with the ADPP team, website developers and UCLA counterpart to evaluate and improve the ARCE Archives website.
❖ Any other tasks as necessary for successful digital publication.

Essential Qualifications

❖ Highly motivated, organized, and detail-oriented individual with the ability to work independently.
❖ Experience in the utilization of various forms of specialized scanning equipment and image processing software.
❖ Excellent research and problem-solving skills. Ability to concentrate and read numerous reports and edit.
❖ Experience with cultural heritage institutions and/or a strong interest in cultural heritage management.
**Digitization and Data Specialist**  
Cairo, Egypt

**How to Apply:** To ensure consideration for this employment opportunity, applicants must reference the Announcement Number and Job Title in the subject line of an email in the following manner: ARCE/20-07, Digitization and Data Specialist to be emailed to Recruitment@ARCE.org. The application package should include an up-to-date CV, letter of interest, and photocopies of educational certifications (e.g. university transcripts, diplomas, certificates, etc.), and a writing sample. Employment Reference letters are optional.

**Reporting Relationship:** This position reports to the Project Archives Specialist.

**Eligibility for Consideration:** Candidates must be legally permitted to work in Egypt.

**Closing date for application to be considered is:** October 22, 2020

Only short-listed applicants will be contacted.

Questions regarding the vacancy may be emailed to recruitment@arce.org

The American Research Center in Egypt is an Equal Opportunity Employer and is seeking a diverse slate of qualified candidates for formal consideration.
